

Why are civic services reforms necessary?

The civic centres established in every state throughout the country with power of census and tax collection will solve following problems pertaining to all sections of the society?

FOR UPPER CLASS

- *The new tax code (NTC) as summarized in the annexure will fulfill their long cherished wish of single point taxation. Multipoint taxation has led to engulfing them in many kinds of tensions .So-called concept of black will vanish. In return of prompt services, adorable atmosphere and social security they must like to pay higher taxes but in fact only about 4 to 5 % of their hard earned income(history reveal that about 90% taxes till 60s , 60% till 70s and 50% till date have led to mass tax evasion).*
- *The availability of one-window services nearby will prevent befooling by the middlemen.*
- *The regular maintenance of roads, corners, parks will surely provide them a neat home like atmosphere outside. They will not have to press their nose or stop breathing while leaving the house /office .*
- *The system will provide them a trained/disciplined workforce with whom one can develop friendly relations. Less migration will surely help in easing of pressure on infrastructure around.*

FOR THE MIDDLE CLASS

- *They have to feel the pinch of higher taxation and resulting inflation forcing them to resort to all means to increase there income . The reforms will enable the govt. to concentrate on availability, price and quality of goods / services.*
- *The employment of only locals by civic Centre will ensure employment to their even less fortunate children.*
- *The one window service will help in saving their precious time & energy, which they can devote on their work.*
- *The salaries , income and payments being tax free will eliminate pressure on the govt. machinery., business organizations /Industry relating to tax deductions & deposits .*
- *The govt. schools & dispensaries will become much more attractive so as to avoid or long for private set ups.*

- *The systematic housing & allied amenities will surely improve standard of living of lower middleclasses.*
- *For the upper middle class, owning luxury gadgets, plots etc. may prove little taxing. but services of civic centre, if implemented in true form under PP model, will satisfy their wish that they like to pay more taxes , if they get good service from the govt. in return.*

FOR THE POOR (The Highest sufferer of the present system)

- *The regular census by the CC due to limited area under control will enable it to provide a helping touch to the needy of the area. The opportunist will not be able to dilute the advantage of any welfare scheme announced(or the scheme benefits will reach directly to the deserving).*
- *The CC will have enough surplus to be spent on- uplifting of the poor, the education of their children, the jobs for their less privileged children.*
- *The villages and areas being developed, they will get a roof to live and training to live reasonable standard of living with pride.*
- *The service agency under PP model near to them can generate enough donations / funds from wealthy and charity inclined persons for their welfare.*
- *The biggest benefit to them & us will be that they will be free from exploitation & slavery of the crooked due to eradication of ignorance and thus preventing their conversion into criminals.*

IF YOU AGREE WITH THE ABOVE KINDLY ACCEPT THE CONCEPT OF THE CC & CCB BY HEART AND START DOING WORK FOR GETTING IT ACCEPTED BY GOVERNMENT. THIS MUST BE YOUR DEMAND FROM THE PARTY LEADERS OF YOUR AREA.
